

Hutton's Smart Cabinet Solution

Hutton Communications and its technology partners are proud to offer a field-proven, configured, energy-efficient, cabinet solution that features advanced network management capabilities.

This solution will save customers time and money with :

- Lower operational costs due to a highly efficient power plant and HVAC.
- Reduced service costs and truck rolls with the deployment of advanced network monitoring and control technology that improves network uptime.
- Saved months of vendor qualification and testing time with best-in-breed technology available today as a tested, integrated package from industry leaders DDB, Asentria, Eltek, and Ice Qube.
- Customized fit for specific project requirements: cabinet size, energy budget, operating environment, and application (LTE, Microwave, DAS).

Today's communications customers face numerous business challenges. As a result, Hutton understands the obstacles associated with network infrastructure deployment. By designing and implementing custom, outsourced solutions, Hutton successfully meets its customers' network deployment needs. And, the result is managed, end-to-end supply chain solutions at the overall lowest total cost with the highest possible performance quality.

Hutton's Smart Cabinet Solution

SYSTEM COMPONENTS AND FEATURES

DDB LTEE-A or LTEE-D

Cabinet provides either direct air cooling or closed loop HVAC and contains over 20RU available space for customer's application. Made in USA with 15 year warranty.

Eltek Flatpack2

48V rectifier provides 96% power conversion efficiency in a highly compact design.

Asentria SiteBoss 571

Provides in-band and out-of-band wireless communication to the cabinet, as well as ability to re-boot DC powered equipment.

Ice Qube HVAC

Provides highly efficient cooling and advanced management via Ethernet connection.

Hutton Communications

Provides a single point of contact for the smart cabinet solution and a wide range of integration and logistical support.

Hutton's nationwide logistical footprint—more than nine warehouses from coast to coast—serves as the foundation of Hutton's success in the wireless industry. Hutton offers access to the products and components required to configure customers' tailor-made wireless solutions. From product procurement to network planning, training, site kitting, configuration, testing and final mile delivery, Hutton boasts a menu of services that is unmatched in the commercial wireless communications distribution industry.

Put Hutton to work for you.
